

what is happening in this country.....what are we becoming? Are we going to become a country that begins to slowly (or quickly) chip away at all the personal freedoms that make this a great place? i subscribed to XM radio because the quality of normal radio stations in this country has deteriorated to the point of worthlessness. not to mention what the FCC's regulations are doing to further erode what radio was all about. last time i checked it was my right to be able to PAY for better radio and better tv, no one should take that away.the local radio stations shouldn't worry they are losing me as a customer. i never listened to the radio until i got XM....before that it was CD's all the time.
